

Bunch Note Feeder (BNF)

NOTE BULK NOTE LOADER

NOTE BULK NOTE LOADER

Bunch Note Feeder (BNF)

Description

There is now a better way to deposit and secure cash. The MEI BNF (Bunch Note Feeder) improves efficiencies by reducing the amount of time required to process cash—and doing so in a way that improves both security and customer service.

Stacks of notes are efficiently placed in the BNF tray to minimize queue times and cash exposure while reducing the cash maintained. The automated transition of notes from the BNF to the SC Advance allows associates to spend more time with customers on the retail or bank floor, which improves service and, ultimately, customer loyalty.

Benefits

User-friendly operation. Integrated note reject path divider for uninterrupted cash handling process

Easily retrofitted into existing SCL/SCXL and Stackerless product lines

Flexible design. Available in single width or multi-width options that makes this product globally ready

Superior technology. Increase productivity and ROI by accepting up to 30 notes at once

Increased note-to-note speed. Reliable friction based technology

NOTE BULK NOTE LOADER

Specifications

Note Speed

- Denominated and stacked in less than 1.5 seconds

Note Insertion

- 4-way

Operating Voltage (V)

- 15-28 VDC
