

CashFlow 8000

COIN CHANGER

mei®

CashFlow 8000

Description

The CF 8000™ coin changer introduces a complete payment solution that merges coins, cashless payments, auditing, and cash management in one easy-to-use system. Building on the successful CashFlow® 7000 series, this MEI coin changer offers better cash control encompassing the tools most useful to operators managing revenue.

Combine with an integrated cashless reader, the CashFlow Series 8000 gives more payment options without the need for additional hardware. Compatible with a variety of existing cashless peripherals, this is the ultimate coin changer for busy operators looking to minimizing time spent on managing their cash.

COIN CHANGER

Benefits

Simplify your audit collection. Reduces mistakes and training requirements with audit collection options—including USB and IrDA

Eliminate 'lost' audits. Single point of audit on each machine to better manage your field base

Stop unnecessary service calls. Sonar technology accurately monitors the amount of change in tube

Eliminate the duplication of electronic components. Integrated cashless reader delivers the lowest cost cash & cashless solution

Specifications
