

MICROpay6

ePAYMENT TELEMETER

MICROTRONICS

MICROpay6

Description

MICROpay6 combines universal payment choice with the power of an integrated telemeter. Safely control and encrypt cash and cashless payments through automated data transmission.

Receive detailed sales and product statistics, individual transactions, and real-time vending machine alerts. This network appliance makes remote price changes, settings updates, and software upgrades easy and from anywhere. Unite universal payment options and telemetry with MICROpay6.

Benefits

Effortless mobile payments. Enable e-vending by using online QR codes from your mobile app

Relay audit insights. Transfer encrypted audit data via telemetry for cash and cashless payments

Secure system for unattended sales. Complete alarm management and remote maintenance with advanced reporting system
